Hands-On Activity Adding code chunks to R Markdown notebooks

Gino

2023-05-25

Step one

To call the required libraries, load the penguins data, and return a view of the penguins data:

```
library(ggplot2)
library(palmerpenguins)
data(penguins)
View(penguins)
```

Step two

Create the Visualization

```
ggplot(data = penguins) +
  geom_point(mapping = aes(x = flipper_length_mm, y = body_mass_g))
```

```
## Warning: Removed 2 rows containing missing values ('geom_point()').
```
